

BASIC SPECIFICATIONS:

ENVIROTANKERS™ TRAILER

- Two Fuel Compartment Configuration (40% front, 60% rear)
- Carter Bottom Loading System - Auto Shutoff (overfill protection)
- Electric Rewind Hose Reel with Aviation or Construction Grade Hose
- Auto Air Eliminator and pressure Relief Valve
- Emergency Shut Off Control
- Cabinet Storage for Lubricants, Tools and Other Accessories

OPTIONS:

- Fuel pump with Aviation or Construction Grade Filter System
- 7000 Gallon/ 25,000 liter capacity
- 10,000 Gallon/ 40,000 liter capacity
- 3500 to 6500 Watt Diesel Generator
- Multiple Fuel Forwarding Systems for both Jet Fuel and Diesel storage & dispensing onsite
- Fuel Meter system
- External Helicopter/Equipment plug-ins to Generator,
- Dead Man Control Systems for Higher Flow Rate Capacity
- Satellite/Cell phone based fuel monitoring and location systems

NEW!

ENVIROTANKERS™ TANK TRUCK

- US 4,000 gallon
- CDN 17,000 liters
- Double walled, aluminum construction
- Integrated fuel forwarding
- Designed to support pup trailers
- Carter Bottom Loading System - Auto Shutoff (overfill protection)
- Auto Air Eliminator and pressure Relief Valve
- Emergency Shut Off Control
- Cabinet Storage for Lubricants, Tools and Other Accessories

OPTIONS:

- Fuel pump with Aviation or Construction Grade Filter System
- Diesel Generator
- Fuel Meter system
- External Helicopter/Equipment plug-ins to Generator,
- Satellite/Cell phone based fuel monitoring and location systems

ENVIRONMENTALLY RESPONSIBLE
MOBILE REFUELING FOR EXPLORATION
AND CONSTRUCTION

FUELING SOLUTIONS WITH ENVIRONMENTAL INTEGRITY

EnviroTankers introduces a complete product line of double walled, environmentally friendly Tank Trucks and Trailers.

No more costly berming, torn berm liners, or defueling to move skidded tanks. Simply drive the Mobile EnviroTanker directly to the work site with full fuel and park and start fueling. When it's time to move fueling locations, just drive away.

EnviroTankers meet U.S. and Canadian transportation regulations, and also comply with Environment Canada and US EPA SPCC (secondary containment) environmental guidelines. Both Aviation and Construction EnviroTanker models are available for jet fuel and diesel.

ENVIRONMENTAL AND BUSINESS VALUES AND BENEFITS:

- Fully mobile 110% containment Tank Trucks and Trailers
- Protect against environmental contamination
- Reduce risk, liability and insurance costs.
- Eliminate costly and time-wasting containment and site reclamation.
- No fuel purging required.
- Project analysis tool confirms operational cost efficiency.
- Meets US and Canadian Transportation and Environmental Protection regulations.
- Environmental Consultation regulatory review available
- Reduce helicopter airtime and carbon footprint.

ENVIROTANKERS™ - DESIGNED AND EQUIPPED FOR ENVIRONMENTAL PROTECTION

- Double walled construction provides additional external protection
- 110% containment compliant with EPA SPCC regulations
- Spill control in fuel cabinet for bottom loading system and hose
- Overfill protection with Carter bottom loading components and auto shutoff at 97% fill volume
- Spill kit in fuel cabinet
- Emergency Shutoff Control

ENVIRONMENTAL, MANUFACTURING, AND TRANSPORT REGULATION COMPLIANCE

- TC 406
- US DOT 406
- UL 14
- ULC S653
- UL/ULC compliance for 110% containment, overfill protection and spill control
- US EPA 40 CFR Part 112, oil prevention, spill prevention, control and countermeasure plan requirements. (SPCC)
- Environment Canada Secondary Containment Compliance.

REGULATORY REQUIREMENTS AND PROJECT COST ANALYSIS

As experts in the emerging field, EnviroTankers provides valuable expertise on regulatory restrictions and return on investment calculations. Call or visit our website for more information.
